CRUISE REPORT

Project:	Puerto Rico Marine Geology Co-op
Ship:	6.5-m small boat
Cruise No:	79-4
Area of Operations:	Estuaries of Rios Espiritu Santu and Loiza, P.R.
Dates:	22-23 May 1979
Science Party:	Arturo Torres, USGS/WRD/San Juan, Chief Scientist Al Goodman John Larson
Days at sea:	Ship days 1, Man-days (Atl.-Gulf Branch) 2

Purpose/Accomplishments: Determine thickness of alluvium in estuaries of Rio Espiritu Santo & Loiza. Successful results in Rio E.S.; Loiza in flood and un-navigable so no results there.

Navigation: Top sheet and eyeballs

Equipment: Uniboom, portable generator

Comments:

1. Goodman and Larson did a very good job in difficult circumstances.

2. Don't try to work in rivers while they are in flood.
